## PEACHTREE ROAD UNITED METHODIST CHURCH

The new four manual and pedal, 72 stop organ for Peachtree Road United Methodist Church in Atlanta, USA was completed in September and opened with a recital by Olivier Latry on the 12th of January 2003. It has mechanical action (including couplers) to the Great, Swell, Choir and Pedal Organs, the Solo Organ (on higher pressure) having electro-pneumatic action. It also has optional electric coupling. The console is detached from the organ and sited in the Choir Stalls affording the organist good eye contact with the Choir. The Great, Swell and Choir Organs are housed in the left hand case, the Pedal and Solo Organs in the right case. The trackers are amongst the longest ever employed, but the attributes one expects of a sensitive mechanical key action are retained.
